

Frontend engineer, five years in production React and TypeScript. Right now I contribute to the back office, corporate and business applications for FIB, an Iraqi bank with more than two million app installs. Before that: the smart TV app and IMS back office for MyTV+, a streaming platform carrying 450+ live channels, 10,000+ movies and 5,000+ series, and the platform Newroz Telecom and Fastlink use to sell SIMs and manage their agent and showroom network. I also write Node, Express, Prisma and PostgreSQL on my own full-stack projects.

EXPERIENCE

OCT 2021 — PRESENT

- Frontend Developer — Tailored Applications

FORMERLY GATEWAY ICT

APR 2025 — PRESENT

REMOTE

- Contributing to the back office, corporate and business applications for FIB, an Iraqi bank, in React and TypeScript.
 - Contributing to the shared component library and design system rather than one-off screens.
 - Built large React and TypeScript applications for MyTV+ before moving to the FIB team in June 2026, getting productive in the new codebase quickly.
 - Cutting load and interaction cost through code splitting, lazy loading and tighter state management.
 - Owning bug fixes, accessibility and cross-browser behaviour on the features I ship.
 - Reviewing code and mentoring teammates on patterns, consistency and frontend quality.
- Frontend Developer — Fastlink Telecom

MAR 2024 — MAR 2025

REMOTE

- Built dashboards and internal management systems used daily by agents and operations teams at Newroz Telecom and Fastlink, both part of the Allai Newroz group.
 - Implemented advanced filtering and reporting interfaces over data-heavy workflows.
 - Built role-based UI rendering that matched backend authorization and access control rules.
 - Refactored legacy frontend code into modular, reusable components.
- Frontend Developer — Gateway ICT

NOW TAILORED APPLICATIONS

SEP 2022 — MAR 2024

REMOTE

- Delivered internal and client-facing React and TypeScript applications across the product line.
 - Built streaming platform interfaces and advertising management tools supporting daily business operations.
 - Standardised UI components and design patterns so teams stopped rebuilding the same pieces.
 - Improved frontend performance with lazy loading, memoisation and leaner state management.
- Frontend Developer — iQ Group

SULAYMANIYAH

OCT 2021 — SEP 2022

- Built internal Angular and TypeScript applications for telecom reporting and regional analytics.
 - Built dashboards and data-driven interfaces for recharge and subscription reporting workflows.
 - Implemented responsive components with SCSS and Material UI, and integrated the REST APIs behind them.

PROJECTS

SELECTED

FIB Back Office · Corporate · Business

BANKING · WEB

Three of the applications behind an Iraqi bank with more than two million app installs. Contributing frontend features in React and TypeScript, plus shared component library and design system work.

MyTV+ Ecosystem

WEB · TV APP

Regional streaming and advertising platform carrying 450+ live channels, 10,000+ movies and 5,000+ series. Smart TV client plus the IMS back office behind it, covering content delivery, ad inventory, brand partnerships and campaign execution.

KSC System

ENTERPRISE WEB

Mission-critical platform for multi-branch operations — case management, funder relations and event coordination, with data integrity as the hard requirement.

Fast SIM

PWA · WEB

Sales platform for Newroz Telecom and Fastlink internet SIMs, covering both physical SIM and eSIM, with management for their showrooms, agents, dealers and representatives. Custom filters, reporting and real-time agent management.

Authentication Server

WEB

Identity and access management for internal systems: registration, role-based access control and granular permissions.

Spotlight

REACT NATIVE

Social application with dynamic feeds, image posting, notifications and engagement features.

Also shipped

ADDITIONAL

Smart Offers (geo-fenced marketing) · Fast Serve (restaurant and inventory management) · Hotel System (integrated with MyTV+) · Government Report System (regional analytics) · Heart Beats healthcare branding and the MyTV+ brand site.

SKILLS

CORE	React · Next.js · TypeScript · JavaScript · React Native · Angular
STATE	Redux Toolkit · Zustand · TanStack Query
UI & STYLING	Tailwind CSS · SCSS · Material UI · shadcn/ui · Figma
BACKEND	Node.js · Express · Prisma · REST · JWT
DATABASES	PostgreSQL · MongoDB · MySQL
TESTING	Jest · Vitest · React Testing Library
TOOLS	Git · Jira · Linux · Code review · Agile delivery
